

Functional Health & Longevity Program

Program Overview — Patient Guide

Functional Health & Longevity Program · KORB Health Group · For Patient Reference

This guide is for educational reference only. It is not medical advice. Your KORB provider determines which program and medication(s) are right for you. If you have questions, contact KORB by phone or email (see contact information below).

What Is the Functional Health & Longevity Program

KORB's Functional Health & Longevity Program is a physician-guided, cash-pay telemedicine program built around select injectable peptide therapies. After a clinical intake and review, your KORB provider determines which program tier and medication(s) are appropriate for your goals. This guide is a general orientation to help you understand how the program is structured — it is not a substitute for your provider's individualized guidance.

Choosing Your Program

Your provider places you into one of three program tiers based on your goals and clinical profile. All three run on the same 16-week cycle.

Foundation Program

One active peptide at a time. Your provider selects a single agent based on your goals — Sermorelin, CJC-1295 / Ipamorelin, or BPC-157. You may switch to a different agent at each 16-week follow-up, though only one is ever active at a time.

Gateway Program

A staggered two-medication combination. Sermorelin begins on your start date, with BPC-157 added two weeks later. GHK-Cu is available as an optional add-on, beginning two weeks after you start BPC-157.

Peak Performance Program

Choose Pathway A (CJC-1295 / Ipamorelin) or Pathway B (Tesamorelin). Both follow the same staggered structure as Gateway — primary agent begins on your start date, BPC-157 two weeks later — with the same optional GHK-Cu add-on.

Pricing:

Program pricing varies by tier. For current pricing, contact KORB Operations or ask your provider at your visit.

How Your 16-Week Cycle Works

- Baseline visit — labs only. No prescription is sent at your first visit.
- Once your baseline labs are back, KORB Operations schedules the visit that starts your 16-week cycle.
- When starting a 16-week cycle, your provider reviews your labs and starts your prescribed medication(s).
- A lab order is placed at the beginning of your cycle for a draw at Quest Diagnostics, to be completed between weeks 12 and 14 of your cycle — this ensures results are received before your 16-week follow-up visit.
- At your 16-week follow-up visit, your provider reviews your labs and response, then renews, adjusts, or changes your program for the next cycle.
- Each cycle includes an off period between active courses for lab review and lifestyle focus.

What to Expect

Response to peptide therapy varies from patient to patient. Results aren't guaranteed, and when they occur, they typically build gradually over the course of a cycle rather than right away. Your provider reassesses your program at every 16-week follow-up visit.

Labs & Monitoring

Baseline labs are required before starting any program. A lab order is placed at the beginning of each 16-week cycle for a draw at Quest Diagnostics.

Complete your lab draw between weeks 12 and 14 of your cycle so your results are back in time for your 16-week follow-up visit — results typically take about a week to come back.

Safety Reminders

- Use your medication(s) only as prescribed. Do not change your dose, course length, or schedule without provider direction.
- Do not combine programs, agents, or doses on your own.
- These programs are not appropriate during active malignancy or pregnancy.
- Tell your KORB provider about any new medical condition or medication, or if you become pregnant.
- Your prescription label is the authoritative source for your dose and directions.
- Use a new syringe for every injection — do not reuse syringes.
- Follow your state or local regulations for sharps disposal.

When to Contact KORB and When to Seek Emergency Care

Contact KORB — Phone or Email

- Questions about your program, pricing, or scheduling
- Questions about your medication instructions
- Mild side effects or concerns about your response
- General questions about the Longevity Program

Email: info@korbhealth.com

Phone: [+1 \(888\) 959-7299](tel:+18889597299)

Hours: Monday – Friday, 9 AM – 6 PM (Central Time)

Seek Emergency Care Immediately

- Trouble breathing or throat / face swelling
- Severe rash or widespread hives
- Chest pain or fainting
- Severe or rapidly worsening symptoms
- Confusion or severe weakness
- Any symptom that feels urgent or unsafe

Phone and email are not appropriate for emergencies. When in doubt, go to urgent care or the emergency room.

Key Reminders

- Your provider selects your program and medication(s) — this guide is a general orientation, not personalized medical advice.
- Baseline visit = labs only. No prescription is sent at your first visit.
- Each cycle is 16 weeks, with a lab draw between weeks 12–14 and a 16-week follow-up visit.
- For current program pricing, contact KORB Operations or ask your provider.
